Tourism in **ALBANIA**

Thermal Water Therapy | Hydrotherapy | Electrotherapy | Mud Therapy | Physiotherapy | Thermotherapy | Oxygen Therapy | Reflex therapy with CO2 gas injections | Osteopathy | TECAR Therapy | Shock Wave Therapy | Etc.

Introduction

Why You Should Choose **ALBANIA**

A country blessed with all the treasures that nature can offer.

Albania is home to therapeutic landscapes where thermal baths and hot springs, known as Llixha, meet with nature, history, and architecture.

Rich in minerals and healing properties, the thermal baths of Albania, were mentioned since the Roman period.

The thermal springs contain very hot sulfuric waters, which are formed at a depth of about 13,000m from the earth's surface, as a result of the fusion of oxygen with hydrogen and other chemicals.

Driven by high pressure of gases, they come to the surface through rock cracks. The waters of these springs have been classified with having high therapeutic values, for treating numerous diseases of the respiratory tract, nervous system, skin, stomach, etc., as well as cosmetic values.

Destinations

Best Thermal Spas & Hot Springs in Albania

- Elbasan Thermal Baths
- Benja Thermal Waters, Përmet
- Leskovik Thermal Waters
- Bilaj's Thermal Springs
- Peja Thermal Water, Kosova
- Peshkopi Hot Springs

Choose yours

Popular Thermal Therapy

✓ Fangoterapia

“ Fangoterapia is a treatment that is carried out through the application of mud of volcanic origin, which is taken directly from the source of thermal waters. This therapy is recommended for the treatment of osteoarthritis and skin diseases.

✓ Hydrotherapy

“ Hydrotherapy has a therapeutic effect because it changes the body temperature, improves the functioning of the lymphatic glands, heart, immune system, blood circulation, digestive system, as well as helps the muscles, and cures rheumatic diseases and skin problems

✓ Electrotherapy

“ This stimulation is done in order to promote and facilitate the process of muscle healing and tissue regeneration, relaxation of muscle spasms, improves range of motion, reduction of pain (chronic, post-trauma, and acute after surgical interventions), improves circulation blood.

✓ Physiotherapy

“ Physiotherapy assesses, prevents and rehabilitates problems of the musculo-skeletal apparatus born or acquired during life, with an orthopedic, neurological, rheumatological and other character, using physical therapies, manual techniques and rehabilitation protocols that are needed to recover the patient's function and physical well-being.
